APPROVAL OF STATE ENGINEER		
This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the		
following limitations and conditions:		
This permit is issued subject to existing rights and is further subject to revocation if and when water can be furnished		
by an entity such as a water district or a municipality engaged		
in furnishing water. A totalizing meter must be installed in the discharge pipeline, near the point of diversion, and accurate		
measurements must be kept of water placed to beneficial use. It		
is understood that this right must allow for a reasonable lowering of the static water level. The well shall be equipped with a		
2 inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent		
waste. This source is located within an area designated by the		
State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any		
and all times.
